PROJECTS

SchedulePro — Enterprise Scheduling & Resource Allocation System

Tech Stack: Java, Spring Boot, React.js, PostgreSQL, JWT, Docker, CI/CD, Render

- Developed a full-stack employee scheduling and resource management application.
- Implemented JWT authentication and role-based access for Admin, Manager, and Employee users.
- Built REST APIs for employees, projects, schedules, leave, and task management.
- Developed responsive React dashboards and integrated PostgreSQL using Spring Data JPA.
- Configured CI/CD and deployed the application on Render.

ChatPro — Microservices Chat Application (In Progress)

Tech Stack: Java 17, Spring Boot, Spring Cloud, Eureka, JWT, MySQL, Redis

- Developing a microservices-based chat application with Spring Boot and Spring Cloud.
- Implemented Eureka Service Discovery, API Gateway, JWT Security, Redis, and Circuit Breaker.
- Developing authentication and MySQL database integration.
- Planned WebSocket messaging, notifications, file sharing, and React frontend.

Sawari — Women's Safety Web Application | Academic Project

Frontend: React.js

- Designed and developed the frontend for an academic women's safety web application.
- Created responsive user interfaces focused on quick access to safety-related features.
- Implemented frontend screens and user flows for emergency assistance and trusted-contact communication.
- Focused on usability, responsive design, and a simple interface for emergency situations.
